

## 8"Repair Clamp

**Product/Service:** 8" repair clamp

**Tool Year:** 2018, August

**Location:** Offshore

**Client:** Global Service Company

### Project Description

- IK-Group performed a project supplying a repair clamp for an 8" pipeline.
- The main objective of the project was to physically lock the clamp and pipeline together therefore, securing the long-term sealing function.
- Any further movements of the pipeline at the bend location will not introduce any deformation / movements at the sealing locations.

### Operational Parameters

- Size: 8"
- Design Pressure: 99 bar
- Strength Test Pressure: 142 bar
- Leak Test Pressure: 109 bar
- Packer (seal): Elastomer/HNBR
- Medium: Sweet gas (Pipeline)
- Water Depth: 40m
- Temperature: 4°C to 50°C (Pipeline)
- Installation method: Diver
- Design Life: 25 years

### Delivery

- No of clamp installed: 1
- Delivery time: 8 Weeks
