

EPRS System

Product: **EPRS System**

Compatible with: **16", 18" & 24" pipelines**

Maximum Operating Pressure: **431 bar**

Design Water Depth: **3,000m**

Product Description

This EPRS covers 16", 18" and 24" pipeline sizes and it guarantees to secure the sealing and structural integrity of mentioned pipelines, in case of emergency. The EPRS is modular in its design, where sealing clamp and structural clamp are separate in case the damaged pipeline does not require structural repair. It comes with a dedicated installation/deployment tool which can handle all sizes in both horizontal and vertical orientation. It has been designed to withstand the wave loads in the splash zone and comes with a 20 year lifetime expectancy for both fatigue and corrosion.

Specifications

- Applicable for both gas and liquid pipelines
- Double barrier with test port
- Lifetime - 20 yrs
- Dedicated All-Remote Installation and Deployment Tool
- ROV and Diver compatible
- Double barrier with test port
