

IK-Valkyrie PurgeDam System™

www.ik-worldwide.com

Product: IK-VALKYRIE PURGEDAM SYSTEM™

Pipe Schedule: VARIOUS

Size Range: 10" through 16" (*Larger sizes on request*)

IK's Valkyrie PurgeDam System™ is a specialized Back-gas purging system for welding operations. It has been custom designed to allow removal through confined outlets, without requirement for flushing of the pipe/pipelines after welding compared with traditional methods.

The system offers optimal gas purge and results in a high-quality weld.

AVAILABLE FOR HIRE

IK has an entire range of Valkyrie Systems™ available for hire

General Function and Application:

- Ideal product range: 10 - 16 inch
- Control unit with integrated flowmeter to control the injection of gas on the different stages of the welding operation
- Material type: Plastic foil
- Heat and flame-resistant purge hose which allows even distribution of the gas for the welding operation, without risk of burning hoses
- Accurate purge control adapted to the different stages of the welding operation
- Plug & Play installation and removal
- Efficient and fast evacuation of Oxygen after grinding operation
- Incorporated safety line feature
