

IK-Valkyrie PurgePro System™

www.ik-worldwide.com

Product: IK-VALKYRIE PURGEPRO SYSTEM™

Pipe Schedule: VARIOUS

Size Range: 2" through 8" (Larger sizes on request)

IK's Valkyrie PurgePro System™ is a specialized Back-gas purging system for welding operations which has been custom designed to allow removal through confined outlets, without requirement for flushing of the pipe/pipelines after welding compared with traditional methods.

The system offers optimal gas purge and results in a high-quality weld.

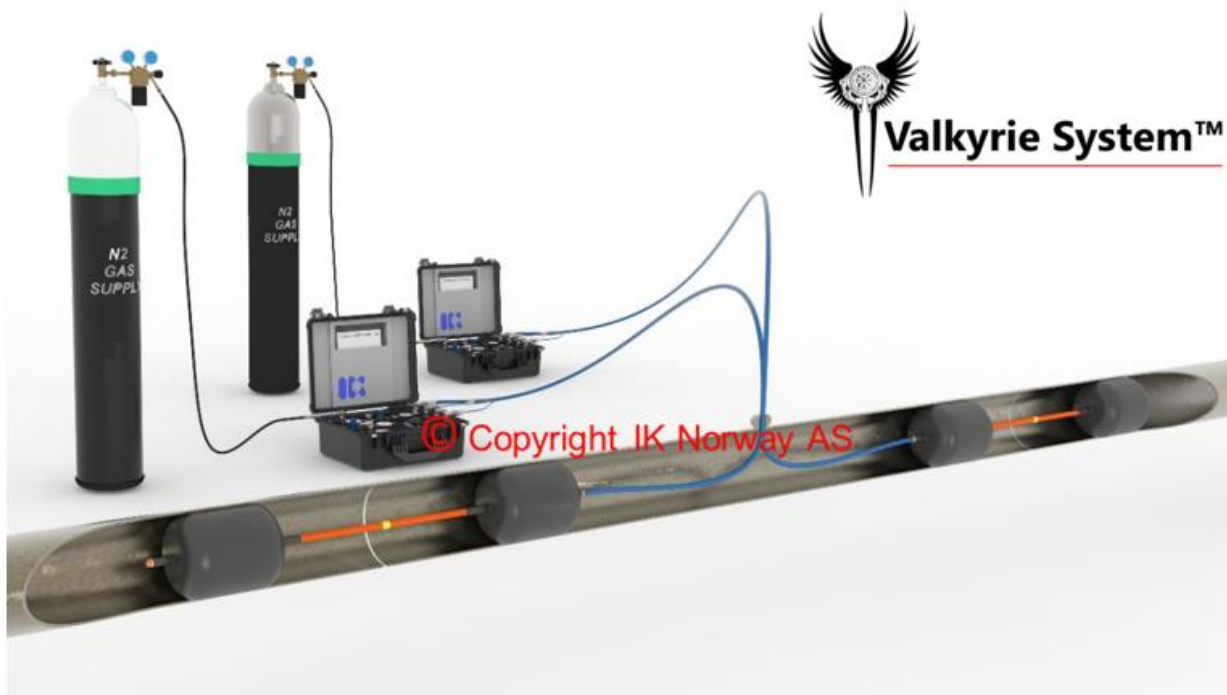

SPECIALIZED BACK-GAS SERVICES

IK's specialized technical services and range of Valkyrie Systems™ are available for back-gas operations – Contact IK-Norway

General Function and Application:

- Ideal product range: 2-8 inch (Larger sizes on request)
- Minimum withdrawal branch size: 1" (28mm)
- Control unit with integrated flowmeter to control the injection of gas on the different stages of the welding operation
- Latex barriers with heat and flame-resistant material covers
- Heat and flame-resistant purge hose which allows even distribution of the gas for the welding operation, without risk of burning the hose
- Accurate purge control adapted to the different stages of the welding operation
- Plug & Play installation and removal without debris
- Incorporated safety line feature
- A bypass facility can be included for branch withdrawal size ≥ 2 "
