

# Resato Air-driven Mini Pump

Resato's new mini pump is available in four pressure ranges up to 1800 bar at 7 bar air drive pressure and 2500 bar at 10 bar air drive pressure. The Resato air driven mini pump has a compact design. It operates on the simple but efficient principle of an automatic reciprocating differential area piston. A relatively large air-operated piston is connected to a smaller high-pressure piston to convert compressed air flow into fluid flow at high pressure. The Resato P80 pump has no mechanical pilot valves and contains inlet and outlet check valve cartridges. As a result, the pump has a low noise level and is easy to maintain.

## Key features

- Low noise level
- Inlet and outlet check valve cartridges
- Easy and low-cost maintenance
- Suitable for pressurizing oil, water or other fluids
- Several pressure ranges available
- All parts made of non-corrosive materials

## Functioning

- The Resato mini pump type P80 is manufactured according to European regulations and will be delivered including:
- Operating manual
- Maintenance manual
- Spare parts manual
- Test certification
